

THE MONSTER WARSHIPS BUILDING IN BRITAIN

Monster Superdreadnoughts to be Out-classed by Craft.

Warships equaling in tonnage the big trans-Atlantic liners and far surpassing in armament the monster super-dreadnoughts already built and building, are in all probability now under construction in Great Britain. An editorial in the November number of Sea Power says:

"It is reported that Great Britain is installing 18-inch guns on her latest type of battleship. A reliable observer, recently returned from England, saw under construction there a battleship (or battle cruiser) larger than anything building or contemplated elsewhere."

"The Navy Department, it is said, has received rumors that Great Britain is building one or more battleships of 40,000 tons displacement. It is believed that, if this be true, these vessels will probably carry batteries of ten 18-inch guns."

"For the United States this news is of extreme importance. While it is too late to modify the design of those ships of our program which are to be laid down almost immediately, the designs of the remaining ships contemplated, but not yet appropriated for, including six battleships and two battle cruisers, should be such as to make them superior to anything building or contemplated abroad."

BAN PUT ON STORAGE OF JUNK ON STREETS

Washington will take on a more "dressed-up" appearance after New Year's Day, when an order of the Commissioners prohibiting storage on public space will go into effect.

Lumber and junk dealers whose stock has littered the space between building lines and sidewalk will be obliged to make other arrangements before that date.

The order abolishing the abuse has been addressed to about seventy firms. Under police regulations occupants of stores on business streets are allowed three feet from the building line for display of goods. Four feet is allowed on nonbusiness streets, but the time of occupation is limited to business hours. All other occupancy of public space, the Commissioners declare, is unlawful.

Cured His RUPTURE

I was badly ruptured while lifting a trunk several years ago. Doctors said my only hope of cure was an operation. Trusses did me no good. Finally I got hold of something that quickly and completely cured me. Years have passed and the rupture has never returned, although I am doing hard work as a carpenter. There was no operation, no loss of time, no trouble. I have nothing to sell, but will give full information about how you may find a complete cure without operation if you write to me, Eugene M. Pullen, Carpenter, 51C Marcellus Avenue, Manassas, N. J. Better cut out this notice and show it to any others who are ruptured—you may save a life or at least stop the misery of rupture and the worry and danger of an operation.—ADV.

Demonstration of the Easiest and Best Way to Clean Silver

The Silver-Clean Pan

The Silver-Clean Pan is a specially constructed pan for cleaning silver without labor.

The Silver-Clean Pan cleans by galvanic action. You place a solution of water, bread soda and salt in this pan and then put your silver in and almost instantly every particle of tarnish and dirt is removed.

There is no injury to your silver. You could leave it in the solution for days at a time and the quality and finish would not be harmed. Cleaning silver with the Silver-Clean Pan eliminates all rubbing and polishing with various chemical preparations, and it also eliminates all hard labor and accomplishes the result in a fraction of the time required in the old way.

Silver cleaned in the Silver-Clean Pan always has a soft, velvety, smooth finish; no hard and scratched surface and no dark places are left around the handles and in the carving of the pattern.

Silver-Clean Pans priced from **\$1** to **\$35.00.**
